About me

Frontend developer with 7+ years of experience building modern web applications using TypeScript, React.js and Vue.js. Experienced in developing scalable SaaS, CRM, marketplace, and business management systems. Strong focus on frontend architecture, performance optimization, and user experience, with experience in mentoring, code reviews

Education

Saigon Technology University
09/2012 - 11/2016 | College - Information Technology

Skill

Frontend

CSS (9 years)HTML (9 years)JavaScript (9 years)jQuery (9 years)

SCSS (9 years)Bootstrap (8 years)Element Plus / MUI / Vuetify (4 years)

NextJS (4 years)Nuxt.js (4 years)ReactJS (4 years)Typescript (4 years)

VueJS (4 years)Vuex / Pinia / Zustand / Redux (4 years)Storybook (2 years)

React Query / TanStack Query (1 year)

Backend & Database

MySQL (3 years)PHP (3 years)Wordpress (3 years)

Tools & Workflow

Figma / Photoshop / Adobe XD / Sketch (8 years)Git (8 years)Agile (4 years)

CI/CD (4 years)Jira (4 years)Scrum (4 years)Docker (1 year)

Work Experience

05/2024 - 03/2026
SENIOR FRONTEND DEVELOPER | MC Urban Development Vietnam (Mitsubishi Corporation subsidiary)
PROJECT:
Project name: Radanhadat - PropTech Platform

- **Description:** Developed a real estate listing platform enabling users to post, search, and manage property listings for buying and renting. The system supports advanced search, filtering, and lead management to connect property owners with potential buyers and tenants.
- **Responsibilities:**
 - **Monorepo Architecture:** Built and maintained a monorepo architecture for the planning map application, enabling seamless integration into the real estate platform.
 - **Component System & Storybook:** Designed and developed scalable, reusable component architecture, managed via Storybook.

- **Analytics & User Tracking:** Implemented user interaction tracking and collaborated with backend teams to collect and visualize analytics data in Grafana, enabling business teams to monitor user engagement and platform performance.
- **AI-Powered Operations:** Integrated AI-powered listing analysis services into the platform, helping operational teams reduce manual review efforts and improve operational efficiency.
- **Payment Gateway Integration:** Implemented payment integration (VNPT ePay) to enable SaaS subscription and listing fee transactions.
- **Financial Tools:** Developed a financial calculation tool to estimate loan amounts, interest, and repayment schedules, improving user decision-making.
- **Performance Optimization:** Improved application performance and maintainability through frontend architecture optimization and best practices.
- **Mentoring & Code Quality:** Mentored junior developers by conducting code reviews, sharing frontend best practices, and providing technical guidance to improve code quality and team collaboration.
- **Tech stack:** Vue.js, Nuxt, React.js, JavaScript, TypeScript, Redux Toolkit, Pinia, Tailwind CSS, SCSS, ChartJS, Shadcn UI, Sentry
- **Team size:** 11 (3 FE, 4 BE, 1 BA, 1 Tester, 1 PM, 1 Devops)

01/2022 - 05/2024

MIDDLE FRONTEND DEVELOPER | THE COLLECTIVEC GROUP

PROJECT:

Project name: Buho - Restaurant POS (Point of Sale) System

- **Description:** A restaurant management system is a software or application designed to help manage and optimize the operations of a restaurant in El Salvador. This system provides tools and features for order management, table scheduling, payment processing, and business performance tracking.
- **Responsibilities:**
 - **Reusable Component Development:** Developed reusable UI components to improve maintainability and consistency across multiple restaurant management applications.
 - **Real-Time Communication & User Engagement:** Developed real-time communication features using Socket.IO, WhatsApp messaging integration, push notifications, and multilingual support to enhance operational workflows and user experience.
 - **Payment Integration:** Integrated Stripe payment APIs to support secure in-app purchases and payment processing workflows.
 - **Location & Delivery Management:** Implemented Google Maps integration to support order location tracking and delivery management.
 - **API Integration & System Connectivity:** Collaborated with backend engineers to design and integrate APIs for restaurant operations and delivery management.
 - **Code Quality & Team Collaboration:** Participated in code reviews and technical discussions to improve code quality and team productivity.
 - **Frontend Security:** Implemented security best practices to mitigate XSS and CSRF vulnerabilities, ensuring secure user interactions and data handling.
- **Tech stack:** HTML5, CSS, SCSS, Javascript, Vue 2/ Vue 3, Vuex, Pusher, Axios, ChartJS, LogRocket, Pusher, DraggableJS
- **Team size:** 7 (1 FE, 2 BE, 1 BA, 1 Tester, 1 PM, 1 Devops)

03/2017 - 12/2021

WEB DEVELOPER | ORIGIN AGENCY CO., LTD

PROJECT:

Project name: Testmaster - Language Proficiency Test Prep Apps

- **Description:** A comprehensive test management and practice platform designed to streamline exam creation, track user progress, and deliver realistic test-taking experiences.
- **Responsibilities:**
 - **UI Development:** Developed responsive user interfaces based on Figma designs, ensuring cross-browser compatibility and a consistent user experience.
 - **Test Management Features:** Collaborated with backend developers to develop test creation and management features, enabling administrators to create, organize, and manage exam content efficiently.
 - **Maintenance & Support:** Participated in bug fixing, maintenance, and feature enhancements to ensure platform stability and usability.
- **Tech stack:** PHP / Laravel, Javascript, HTML5, CSS, SCSS, Bootstrap, Ajax, JQuery, MySql
- **Team size:** 5 (1 FE, 2 BE, 1 PM, 1 Tester)

Project names: Yamaha Revzone, Moveek, Innolux Footwear, NgayDauTien, TuongAn minigame, Daikin minigame

- **Responsibilities:**
 - **Design-to-Code:** Translate high-fidelity wireframes and mockups (from Figma, Sketch, or Adobe XD) into clean, semantic, and maintainable HTML/CSS code.
 - **Responsive Architecture:** Build mobile-first, fluid layouts that function flawlessly across all devices, screen sizes, and modern web browsers.
 - **CMS Development & Maintenance:** Built and customized **WordPress CMS** solutions using custom fields, while maintaining and enhancing **PHP-based** functionality through bug fixing, feature development, and performance optimization.
 - **Performance Optimization:** Ensure all UI assets (images, fonts, styles) are optimized for maximum speed and scalability.
 - **SEO & Tracking:** Implemented on-page SEO and Google Adwords tracking.
 - **UI Animations:** Implement smooth transitions and micro-interactions using CSS animations or lightweight JavaScript libraries to enhance the user journey.
 - **Standardization:** Maintain and evolve a consistent UI Kit or Design System to ensure visual harmony across different modules of the project.
 - **Collaboration:** Work closely with UX/UI Designers to validate feasibility and with Back-end Developers to integrate visual elements with server-side logic.
- **Tech stack:** PHP, MySQL, HTML5, CSS3, Bootstrap, Javascript, JQuery, Ajax, Wordpress.
